

Profile

Dedicated to Man's Fight against Disease and Pain

Ever since being founded in 1717, Ono Pharmaceutical has for more than 290 years dedicated itself to man's fight against disease and pain, contributing to a healthier, happier life for people everywhere.

We have utilized our long years of experience and know-how to develop innovative therapeutic drugs. And, because all our major products are developed in-house, we have been able to maintain consistent profitability and have built up a reputation for quality and innovation within the Japanese pharmaceutical industry. We are well known for achieving the world's first successful development of prostaglandin-based drugs in 1973, and for our later development of various enzyme inhibitors. Ono Pharmaceutical's commitment to research and development continues today in such new fields as neuroscience, intracellular signaling, and genomic-based drugs.

Dedicated to serving humanity, Ono Pharmaceutical continues the relentless search for highly safe and effective new therapeutic drugs to meet the new and unmet medical needs of people throughout the world.
